

ENVIRONMENTAL POLICY

Alberti Germano e Santi Romano is an international company that deals with the shipment of goods.

Its main objective is to always guarantee maximum efficiency and always guarantee customer satisfaction and its needs. The company operates nationally and internationally, providing its customers with freight and waste transport services; it has consolidated traffic towards the United Kingdom and Northern Europe and on this route it has developed particular skills in the management of import and export flows, through a road and intermodal service (combined road/rail transport).

Among its primary objectives, the company places, in all its areas, the improvement of its results in terms of environmental protection and reduction of pollution deriving from the performance of its activities. For this reason, the balance between the efficiency of the services provided and the eco-sustainability of the processes leads to encouraging virtuous environmental policies and transport proposals that reduce the impact on the environment, in particular on the air sector and on carbon dioxide emissions.

Alberti Germano e Santi Romano Srl is also committed to transparent communication of relevant environmental issues and shares its experiences, in order to contribute to the improvement of the environmental performance of the entire sector.

In order to pursue the continuous improvement of its Environmental Management System, Alberti Germano e Santi Romano Srl undertakes to:

- Comply with the laws and regulations in force and, where they do not exist, comply with standards identified with a sense of responsibility and aimed at safeguarding the environment;
- Define environmental objectives consistent with the results of the analysis of the context and the assessment of risks and opportunities, taking into consideration the needs and expectations of the relevant interested parties;
- Encourage attention and respect for the environment, also of contractors and sub-carriers, emphasizing the responsibility of each one in obtaining the pre-established environmental results and ensuring that suitable operating procedures and personnel training and information programs are implemented in matter;
- Minimize the consumption of energy, raw materials and natural resources deriving from the performance of one's business;
- Manage its activities with the aim of preventing environmental accidents and limiting the sources of pollution, directing the choice, operation and maintenance of its vehicles to this end;
- Prepare procedures to deal quickly and effectively with environmental incidents that may occur in the course of its operations, collaborating with relevant industrial organizations and government agencies;
- Promote and support research to understand the effects of its activities on the environment, to improve environmental protection techniques and to increase its ability to make services compatible with the environment;
- Establish environmental indicators and objectives to evaluate the effectiveness of the measures adopted and carry out reviews of its activities to evaluate the progress made in ensuring compliance with and adequacy of this Policy.

Alberti Germano e Santi Romano Srl maintains an Environmental Management System, implemented according to the UNI EN ISO 14001:2015 standard, which includes the commitment to continuous improvement of its environmental performance.

Alberti Germano e Santi Romano Srl undertakes to keep this Policy updated and to ensure that it is appropriately communicated, understood within the organization and available to all interested parties.
